

VKA & VKS. Die rails for press-tables and die support. Easy to install, fitted with the aid of a truck or a crane. For die weights of 3 tons and more, support-stand is included.

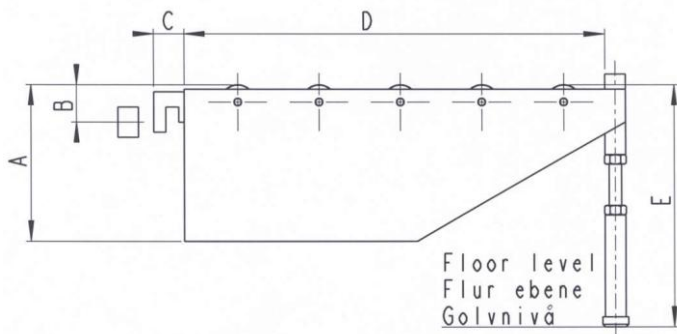

Advantages: Easy to fit to press.
Well suited if a truck or a crane is used when changing die.

Information: Please state height of press-table for those die-rails that are equipped with support-stand (E).

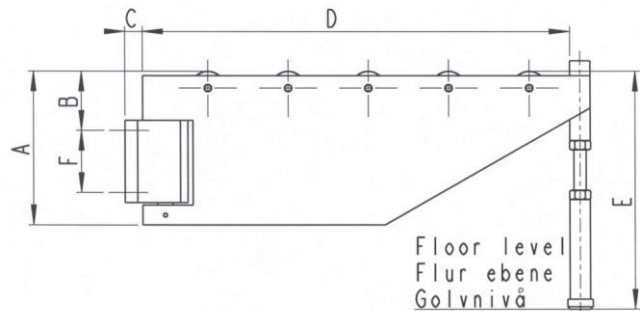

Advice: Order extra fittings for VKA and use the die rails for other presses as well.

When there is a requirement for die rails not included in the standard range, we can provide customised rails upon request. Please request a quotation.
